

Roman Lotsman

Nationality: Ukrainian | **Email address:** lotsmanroman781@gmail.com | **LinkedIn:** Roman Lotsman

EDUCATION AND TRAINING

01/09/2013 – 30/08/2018 Lviv, Ukraine
BACHELOR OF COMPUTER SCIENCE Danylo Halytsky Lviv National Medical University

01/09/2019 – 30/08/2022 Kyiv, Ukraine
MASTER OF SCIENCE (M.S.), MICROBIOLOGY & IMMUNOLOGY Taras Shevchenko National University of Kyiv

WORK EXPERIENCE

SCIENTIST – FARMAK – 05/05/2022 – 10/03/2025 – KYIV, UKRAINE

• Designed and executed mammalian-cell experiments across eight conditions in fibrosis and autoimmune-disease models.
• Owned the quantitative workstream, including statistical analysis, visualization, and quality control.
• Translated experimental results into biological interpretation that guided subsequent studies and decisions.

TECHNICAL SUPPORT SCIENTIST – SPECTROLAB – 05/04/2025 – Current

• Build Python and SQL workflows that consolidate assay-performance data, reagent records, and instrument output from separate systems into a single queryable dataset.
• Query and analyze approximately 50,000 records per month across twelve molecular diagnostic platforms to identify trends and anomalies.
• Evaluate proposed workflow changes before release and document methods, findings, and recommendations for engineering and quality teams.

SKILLS

Python (Pandas, NumPy, Scikit-learn, Seaborn, Matplotlib, SciPy, OpenAI Gym, PySpark) | Databases (PostgreSQL/ PostGIS, MySQL, Redis) | Git/Github, Docker, Gitlab | PyGObject | Front End: (HTML5, CSS3, JavaScript, Sass, MUI 5, Styled Compnents, React, React Roter, | Frameworks: Tailwind CSS, TypeScript, React JS, Node JS | MERN Stack (MongoDB, ExpressJS, ReactJS, NodeJS) | GitGithub Docker Gitlab

PROJECTS

OutcomeOS

Software engineer and AI agent developer with 5+ years of experience in backend development, database engineering, API integration, and AI-powered applications. Founder of OutcomeOS, a decision-intelligence platform integrating real prediction-market data through the Panta API. Passionate about AI, Web3, and building scalable technology products.

TeamFlow

TeamFlow is a MERN-stack project management application that helps teams organize projects, assign tasks, set priorities and deadlines, and track progress through a Kanban board.Built with MongoDB, Express.js, React, and Node.js, TeamFlow showcases backend development and AI integration. The hosted preview uses sample data; live AI requires a configured backend and API key.

DecisionGap-OS

DecisionGap OS is an AI-powered autonomous sales intelligence platform that helps ecommerce businesses understand why customers don't buy, identify purchasing barriers, generate data-driven sales strategies, and automate customer interactions. By combining AI agents, customer intelligence, ecommerce integration, and sales optimization, the platform aims to improve conversion rates, customer experiences, and business profitability.
