TECHNOLOGY

Python · FastAPI

Django · Flask

Node.js · Express

React · TypeScript

PostgreSQL · Redis

MongoDB · MySQL

Docker · Git · GitLab

Pandas · Scikit-learn

LLM APIs · REST APIs

EDUCATION

Bachelor of Computer Science

KPI · APEPS Department

2015 – 2019

SOFTWARE & AI ENGINEERING

BACKEND DEVELOPMENT • APPLIED AI

Software developer focused on practical backend systems, intelligent applications and tools that make complex information easier to use.

ENGINEERING EXPERIENCE

Independent Software Development

PROJECT-BASED · 2026 – PRESENT

Developed project-based software applications including OutcomeOS, TeamFlow and DecisionGap OS, with an emphasis on APIs, data flows, application logic and accessible interfaces.

Enterprise AI Systems — Technical Research

PUBLIC CASE STUDIES · 2026

Studied the public architecture of EPAM StatGPT and AI DIAL: natural-language data access, LLM integration, Python API services and reusable AI model adapters.

SELECTED INDEPENDENT PROJECTS

OutcomeOS

Decision-intelligence application integrating team forecasts, evidence and read-only Panta market signals. Python, PostgreSQL, JavaScript.

TeamFlow

MERN application supporting project workspaces, tasks, progress views and AI-assisted planning. React, Express, MongoDB, Node.js.

DecisionGap OS

Ecommerce decision-intelligence application exploring purchase hesitation, merchant feedback and AI-supported product recommendations.

EXTERNAL TECHNICAL CASE STUDIES

StatGPT / AI DIAL

Public projects developed by EPAM Systems. Examined as architecture references; no personal employment or upstream code contribution is claimed.

Resume reflects independently developed work and labeled external case studies.
